NOTICE TO PARENTS AND GUARDIANS REGARDING ADVERTISEMENTS

As you know, our schools are important community gathering places. As a result, businesses and individuals may try to take advantage of our spaces to distribute promotional materials of various kinds at schools or school events. In some cases, permission is sought and obtained prior to the distribution; in other cases, the promotional materials are not authorized.

We are writing to advise you that our School Division and Schools do not, and indeed cannot, endorse products or services which may be advertised at our facilities. Our Board, administration, teachers and all staff must be focused on meeting the educational and related needs of our students and community.

We cannot, and do not investigate the merits and quality of any service or product offered that may have been promoted at a school or event.

Rita Marler, Superintendent of Schools
